Have a Beautiful Lawn

YOPP OFFER THE BEST IN LAWN MIXTURES FOR THE PURCHASE AREA. Not only are the best of domestic and imported seeds used in YOPP LAWN MIXTURES, every seed is slurry treated with special DUPONT ARASAN which gives Yopp lawn seed protection against decay and destructive soil fungi. This special "Arasan" treatment helps protect young grass seedlings from damping off, blight, root rots and other causes of high mortality suffered by untreated seed. The result is a QUICKER, THICKER STAND.

YOPP'S SUNNY LAWN MIXTURE: Our standard mixture which contains a clean high-germinating mixture of blue grass, red top, chewing fescue, rye grass and white dutch clover. 1 lb. sows 200 sq. ft. (10x20 ft.); 90 to 100 lbs. sows an acre. **By mail, Postpaid, 1 lb. \$1.25; 5 lbs. \$5.30; 10 lbs. \$10.25.**

YOPP'S SHADY LAWN MIXTURE: Our mixture is composed of dwarf grasses especially adapted to shady places under trees and around the house. Under trees apply a double quantity of fertilizer. 1 pound sows 200 sq. ft. (10x20 ft.); 90 to 100 lbs. sows an acre. **By mail, Postpaid, 1 lb. \$1.25; 5 lbs. \$5.30; 10 lbs. \$10.25.**

RENEWING OLD LAWNS:

Every fall and spring fill in the thin and bare spots with more seed. Cut the grass close, apply a good fertilizer, rake in, and broadcast the seed evenly, one pound or more per 500 sq. ft., according to the thickness of the stand and again run the mower over the lawn. This will put the seed into the soil. Water freely.

YOPP'S NEW ALL-PURPOSE LAWN MIXTURE: This is a new formulation eliminating all annual or nurse grasses. Blended for our type soils and climate. 1 pound sows 300 sq. ft. (10x30 ft.); 90 lbs. to 100 lbs. per acre. The **New All Purpose** lawn mixture grows in either sun or shade. **By mail Postpaid, 1 lb. \$1.50; 5 lbs. \$7.00; 10 lbs. \$13.00.**

CHEWINGS FESCUE: A very fine textured grass for medium to heavy shaded areas, acid soils, and poor soils. Makes a dense turf when well cared for. Especially adapted for use under trees. 3 lbs. sows 1000 sq. ft. **By mail, Postpaid, 1 lb. \$1.00.**

HIGHLAND CREEPING BENT: This bent will withstand drought better than other varieties and thrives on stiff soils. One of the finest textured grasses with a dark green color. Seeding rate, 1 to 2 lbs. per 1000 sq. ft. **By mail, Postpaid, 1 lb. \$1.50.**

CREEPING RED FESCUE: Produces turf similar to Chewings Fescue. Leaves are fine, needle-like, of deep green color. Thrives on all types of soils. Excellent for shady places and withstands wear. Sow in spring or fall. 3 lbs. sows 1000 sq. ft. **By mail, Postpaid, 1 lb. \$1.00.**

KENTUCKY BLUE GRASS: Supply limited. Write for prices.

WHITE DUTCH CLOVER. By mail, Postpaid, 1 lb. \$1.25; 5 lbs. \$5.30; 10 lbs. \$10.25.

HULLED BERMUDA GRASS: This is the most important grass in the South. Excellent summer lawn. It does not grow in shaded areas or in groves. Sow hulled seed in May for safe quick germination. 2 lbs. sows 1000 sq. ft. (50x20 ft.). **By mail, Postpaid, 1 lb. \$1.05; 5 lbs. \$4.75; 10 lbs. \$9.00**

RYE GRASS—FOR WINTER LAWNS: A beautiful green lawn during the winter and early spring months can be obtained by broadcasting Rye Grass Seed over any existing lawn. The growth is quick. 1 lb. sows 100 sq. ft. (10x10 ft.). **By mail, Postpaid, 1 lb. 40c; 5 lbs. \$1.35; 10 lbs. \$2.60.**

MERION (B-27) BLUE GRASS: The first improved strain of Kentucky Blue Grass to be sold on the open market. 12 years of testing and observation have shown this strain to be superior to ordinary commercial blue grass. 1 lb. sows 1000 sq. ft., 44 lbs. sows an acre. Costs about the same as common blue grass. **By mail, Postpaid, 1 lb. \$5.00; 5 lbs. \$24.00; 10 lbs. \$48.00.**

ZOYSIA MARELLA OR MANILA GRASS:

Rated as one of the finest of all lawn grasses. Forms a very thick, dense sod of fine textured turf. Grand for full sun to fairly heavy shade. Similar but finer than Bermuda sod, and turns brown later in the fall and turns green earlier in the spring to form a long season lawn of dark green color. Write for our special bulletin. Plant in spring and summer. Can be planted with Merion Blue to form a compact, permanent green turf. Available in sod only. 1 sq. yd. plants about 400 sq. ft. **F.O.B. PLANTING DIRECTIONS

When to plant your Lawn

The finest lawns
are made during the cool months
in fall and spring

Prices and detailed descriptions, see page 14.

Prepare Soil Well

Spade or plow soil 8 inches deep. Remove rocks, roots and litter. Where shady, there is frequently moss, showing lack of fertility, acid condition and poor aeration. To correct this apply agricultural limestone (200 lbs. per 1000 sq. ft.) Add at least one bale of peat moss per 1000 sq. ft. to sandy or clay soils. Work in well with a potato fork before applying fertilizers. Apply 100 lbs. of Milorganite and 25 lbs. of 5-10-10 Vertagreen to each 1000 sq. ft. (50x20). Rake in thoroughly, mixing fertilizer with soil and working the surface smooth and level. Soak ground thoroughly.

Seeding the Lawn

Most grasses, except Hulled Bermuda, Merion Blue Grass and Rye Grass are seeded at the rate of 3-5 lbs. per 1000 sq. ft. See special seeding rates of individual grasses on page 14. Broadcast seeds evenly by hand or with the use of a seeder. Firm with a roller or drag lightly and smoothly with the back of rake, and water thoroughly. Do not cover over one-fourth inch.

Lawn Maintenance

Always keep newly seeded lawns well watered to insure good germination and quick rooting. Make first mowing when grass is 2 inches high setting mower to cut at 2 inches. Feed lawns in March and September with Milorganite organic fertilizer, 30 lbs. per 1000 sq. ft. In dry weather, water lawns thoroughly with a rotary or oscillating sprinkler, soaking ground to a depth of 4 inches or more.
